PROFESSIONAL SUMMARY

Senior automation developer with FinTech process discipline, RPA CoE delivery, custom C# platform work, and recent LLM/RPA integration experience. Strongest value is translating ambiguous human handoffs into deterministic process maps, data requirements, validation gates, fallback paths, and technical briefs that engineers and automated systems can execute safely.

ROLE-RELEVANT EVIDENCE

Reliable workflow logic RPA delivery across edge cases, retries, exception routes, human escalation, and audit-friendly process states.	Data contracts and briefs SQL/VBA reporting, API PoCs, payload thinking, BA/PO-adjacent requirements, and developer-facing standards.	Automation-first delivery 100+ RPA solutions, 50+ operations automations, custom C#/ .NET tooling, and LLM extensions to existing flows.
100+ RPA solutions delivered or maintained	50+ operations procedures automated before RPA	99% success rate on urgent award-winning automation work

EXPERIENCE

Senior Developer, Robotic Process Automation

Sep 2021 - Present

FinTech Automation CoE

- Implemented LLM-assisted extensions to classic RPA business logic, focusing on clear validation boundaries, exception handling, and human escalation when automation should not infer.
- Built extensive multi-bot Blue Prism automations and custom C#, JavaScript, and VB components to remove repeated developer effort and standardise delivery patterns.
- Contributed to reusable internal C# automation components that provide familiar workflow-orchestration features and support a transition toward in-house tooling.
- Supported BA/PO responsibilities during a resourcing gap: clarified stakeholder needs, structured requirements, and supported delivery follow-through.
- Established coding standards, QA practices, reusable development guidance, and quality-control chapter coordination for a growing automation team.
- Trained developers, resolved technical blockers, interviewed junior/mid-level candidates, supported Scrum ceremonies, and built PoCs for APIs, C# apps, VBA, Power Automate, and UiPath.

EARLIER EXPERIENCE

Developer, Robotic Process Automation

Mar 2020 - Sep 2021

FinTech Automation CoE

- Delivered and maintained Blue Prism automations as a certified Blue Prism Developer and Solution Designer.
- Received a WU Star team award for two urgent automation projects delivered under exceptional time pressure, saving multiple FTEs and reaching 99% worked-item success.
- Expanded custom-code capability across C#, .NET Core, XAML, WPF, VBA, and cross-team troubleshooting support.

Database Administrator 2

May 2019 - Mar 2020

FinTech operations

- Automated or redesigned 50+ recurring tasks using VBA and WinForms, connecting Microsoft Office workflows with mainframe, web, and backend FinTech applications.
- Designed Access/SQL reporting queries, compiled management reports, trained groups on SQL/VBA/Access/mainframe topics, and helped define office cooperation rules.

Database Administrator 1

May 2018 - May 2019

FinTech operations

- Managed data in FinTech systems, built SQL reports, supported CIS-region business teams, and began automating recurring operational work with VBA.

CORE SKILLS FOR THIS ROLE

Process Architecture workflow mapping, decision trees, exception gates, fallback loops, control logic, documentation libraries	Technical Interfaces C#, .NET, JavaScript, VB/VBA, SQL, Access, APIs, JSON/payload requirements, mainframe/web workflows
Automation and AI Blue Prism, UiPath, Power Automate, LLM/RPA integration, low-code orchestration, AI-assisted workflow design	Delivery Leadership SAFe 5 Practitioner, Scrum support, BA/PO-adjacent requirements, QA standards, developer training and hiring

SELECTED PROOF POINTS

- **Reusable in-house automation platform:** helped build C# components that preserve familiar automation workflows while moving repeatable capabilities into internal tooling.
- **Applied AI tooling project:** shipped a playable five-level platformer prototype with a completed boss encounter, using LLM-assisted coding and generative-media workflows for art and music.
- **Business-to-engineering translator:** combines process mapping, SQL reporting, technical training, custom code, QA standards, and stakeholder-facing documentation.

EDUCATION, CERTIFICATIONS, LANGUAGES

Education: Cardiff University, BScEcon, Bachelor of Economics and Social Studies in International Relations and Politics

Certifications: Blue Prism Developer AD01; Blue Prism Solution Designer ASD01; SAFe 5 Practitioner

Languages: English C2; Russian C2; Lithuanian C1; French B2; Japanese B2
